PROFESSIONAL SUMMARY

Software Engineer with a B.Eng in Mechanical Engineering and a passion for design-centric development. From architecting advertising platforms at Lohli to leading frontend development for digital banking at Kids Microfinance Bank, I specialise in building secure, high-performance web and mobile applications with React, React Native, Angular, and Next.js.

EXPERIENCE

Kids Microfinance Bank, Lagos, Nigeria - *Senior Frontend Engineer (Contract)*

DECEMBER 2025 - PRESENT

- **Leadership:** Led frontend development for the bank's digital banking platform, mentoring engineers and establishing the architectural patterns and conventions the team built against.
- **Architecture:** Designed a feature-based architecture where each page owns its own data fetching and mutations, with all backend communication routed through a centralised, authenticated HTTP client — keeping auth, error handling, and logging in one place.
- **Performance & Security:** Built resilient error and loading states around the authenticated HTTP client, surfacing clear feedback on failed or timed-out banking requests while validating financial inputs client-side to prevent malformed transactions.
- **Design Systems:** Built a reusable component library to keep UI consistent across the digital banking surfaces.

Lohli Africa, Lagos, Nigeria - *Senior Frontend Engineer(Full-Time)*

MAY 2025 - PRESENT

- Architecting and developing the frontend ecosystem for Lohli, an innovative advertising platform connecting brands, creators, and viewers.
- **Performance Optimisation:** Improved application load times by implementing advanced code-splitting and server-side rendering (SSR) via [Next.js](https://nextjs.org/).
- **Scalable Architecture:** Designed a modular UI component library to ensure brand consistency across the platform's creator and advertiser dashboards.

-
- **Engagement Tracking:** Integrated real-time analytics to help creators monitor viewer engagement and ad performance metrics.

Itex Integrated Services Ltd., Lagos, Nigeria - *Frontend Engineer(Contract)*

NOVEMBER 2024 - MAY 2025

- **Track Money:** Developed comprehensive monitoring dashboards that provide live visibility into transaction success rates, terminal health, and merchant performance, enabling real-time data-driven decision-making.
- **Instant Settlement:** Engineered the frontend workflow for an automated settlement engine, reducing payout latency and providing merchants with immediate access to cleared funds through a secure, transparent interface.
- **VAS (Value Added Services):** Architected a modular service hub to facilitate the delivery of digital products (airtime, utility bills, and insurance), expanding the POS ecosystem beyond simple payments into a full-service financial kiosk.

Zedi Inc, Lagos, Nigeria - *Frontend Engineer(Contract)*

DECEMBER 2023 - NOVEMBER 2024

- **Payment Integration:** Integrated Flutterwave payment gateways using React to process over 1,000 subscriptions, significantly increasing transaction efficiency.
- **Design Systems:** Architected a scalable design system for managing e-commerce products and streamlining customer delivery workflows.
- **Team Collaboration:** Partnered with a team of four to develop a comprehensive e-commerce platform and mentored junior members on code optimisation and bug fixing.

Twoone Technologies - *Frontend Engineer(Part-Time)*

JANUARY 2022 - NOVEMBER 2023

- Developed high-fidelity UI components for a real estate application, improving user navigation and property search efficiency.

The RootHub - *Frontend Developer (Intern)*

JANUARY 2021 - JUNE 2021

- **UI Implementation:** Translated Figma designs into responsive, high-fidelity UI components using HTML, CSS, and JavaScript.
- **Performance Optimisation:** Assisted in auditing existing codebases to improve page load speeds and overall user experience for client projects.
- **Technical Learning:** Leveraged the internship to master React and modern CSS frameworks, which laid the foundation for future roles in fintech and e-commerce.

EDUCATION

University of Uyo, Uyo, Nigeria - *B.Eng Mechanical Engineering*

OCTOBER 2016 - AUGUST 2023

Developed a rigorous analytical foundation by mastering engineering design, fluid mechanics, and thermodynamics, applying mathematical modelling to solve complex physical system constraints.

TECHNICAL SKILLS

Tech Stack Summary

Languages: HTML, CSS/SASS, JavaScript, TypeScript, Java

Frameworks/Libraries: Angular, React, Next.js, Astro, Remix, React Native, TailwindCSS

DevOps & Testing: Docker, AWS, Vercel, CI/CD (GitHub Actions), Jest, Cypress

Tools: GraphQL, Git, Bitbucket, Render, Netlify
